

As a manufacturer of commercial cleaning equipment, we are committed to environmental sustainability and ethically responsible operations. We recognise the impact our activities could have on the environment, and we are dedicated to minimising our ecological footprint by addressing the environmental impact of our products.

We pledge that Numatic International will be Net Zero by 2035*

Our Environmental Commitments:

- 1. Compliance with Environmental Regulations:** We comply with all applicable environmental laws, regulations, and industry standards. Our goal is to not only to meet, but exceed these requirements wherever possible whilst ensuring our operations are environmentally responsible.
- 2. Pollution Prevention:** We work to prevent pollution by minimizing waste, reducing emissions, and using wherever environmentally friendly materials possible in our processes and in the production of our vacuums, cleaning machines, and cleaning equipment.
- 3. Resource Efficiency:** We strive to optimise the use of resources, including energy, water, and raw materials. This includes the implementation of energy-efficient manufacturing practices and designing products that help reduce water and energy consumption during their use.
- 4. Waste Reduction and Recycling:** We are committed to reducing waste at all stages of our operation. We encourage the use of recycled materials wherever possible, both in our manufacturing processes and in the packaging of our products. We aim to eliminate landfill contributions through responsible waste management.
- 5. Continuous Improvement:** We regularly set, monitor, and review environmental objectives and targets as part of our Environmental Management System (EMS). Continuous improvement is key to reducing our environmental impact, and we integrate sustainability considerations into our decision-making processes.
- 6. Sustainable Product Design:** Our Research & Development activities focus on creating durable, energy-efficient products that have a lower environmental impact throughout their entire lifecycle. We consider product longevity, recyclability, and reduced resource use in both the production and end of life product management.
- 7. Employee and Stakeholder Engagement:** We engage and educate our employees, suppliers, and stakeholders about our environmental goals and responsibilities. Induction and training programs ensure that all employees are aware of the environmental impact of their activities and are empowered to contribute to our sustainability objectives.
- 8. Leadership and Accountability:** Our leadership is committed to maintaining and improving the effectiveness of our Environmental Management System, and we allocate resources necessary to achieve our environmental goals. We regularly review and assess our environmental performance to ensure continuous alignment with ISO 14001 standards.

Numatic International is dedicated to reducing our environmental footprint and managing our impact on Global Climate change, whilst delivering the quality products and services our customers expect.

Simon Lawson
Managing Director

Date: 15th November 2024

Net Zero by 2035 for scope 1 and 2 emissions

Net Zero for scope 3 emissions by 2050 in line with UK government targets
